

## 11 13 09 Recommended School Search Method

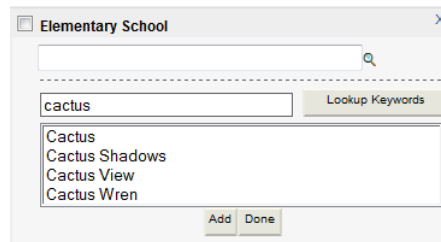

In order to achieve the most accurate results we recommend picking the school you would like to search on from the look-up list as opposed to typing the name of the school directly in the search box.

### Quick Search

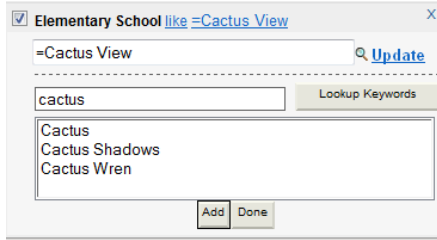

When using a Quick Search, you must first add the field to the search criteria list. This is done by typing the name of the field in the **Add a Field** look-up box, which is the text box next to the big green plus sign. When you stop typing, the list of matching options will appear on the right hand side of the screen. Click the field you would like to add and it will be included in the list on the left hand side of the screen.

Now click on the magnifying glass to open the look-up search to find the school you'd like to use. In this step, less is more. In other words, there is no need to type out the entire name of the school; just type in the first few letters and click on the **Lookup Keywords** button.

Select the school you would like to use and then click on the **Add** button to include it in your criteria.

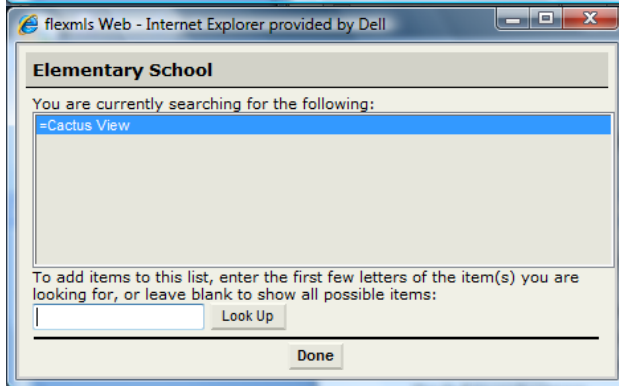

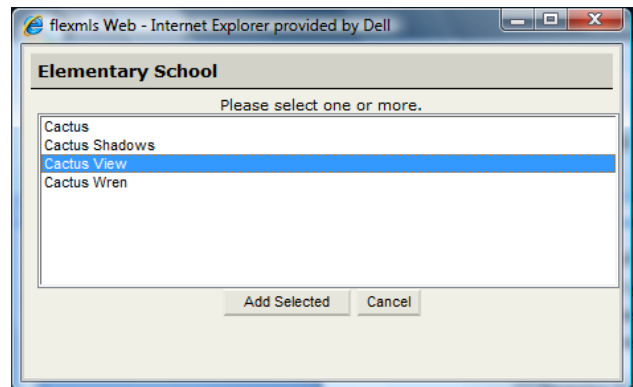

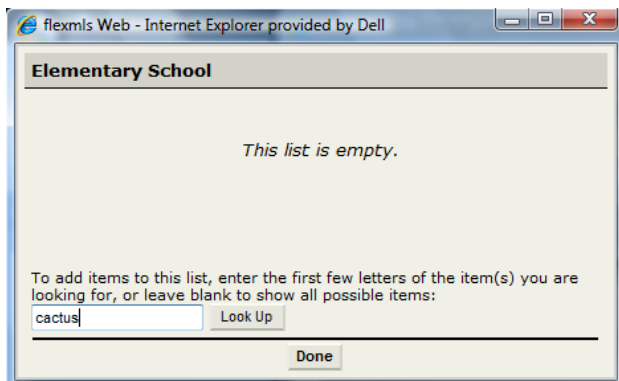

## Full Search

When conducting a Full Search, the school fields can be found on the **Location, Tax & Legal** tab. As you can see, the field gives you the ability to simply type whatever you desire into the box. To ensure accurate results, please look-up the school you would like use from the list by clicking on the magnifying glass to the right on the search box.

A new window will open with a search box. Now remember, less is more. There is no need to type out the entire name of the school; just type in the first few letters and click on the **Look up** button. Then select the school from the list above and click on the **Add Selected** button. From there, click on the **Done** button to return to the Full Search screen and the school will be added to your search.
