

Printing on one page from Internet Explorer

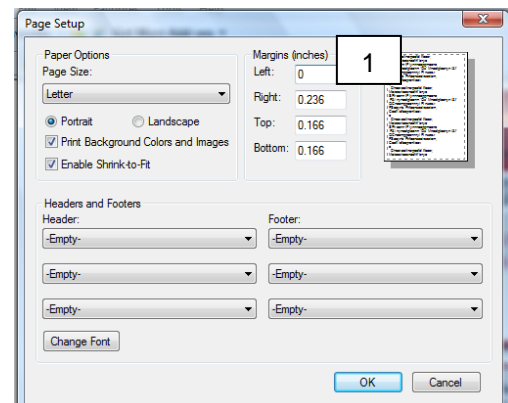

Before printing your Listing Detail Report, open Internet Explorer:

1. Go to *File* on the Menu bar. If your Menu bar is hidden press *ALT* to unhide the Menu bar.
2. Select *Page Setup*.

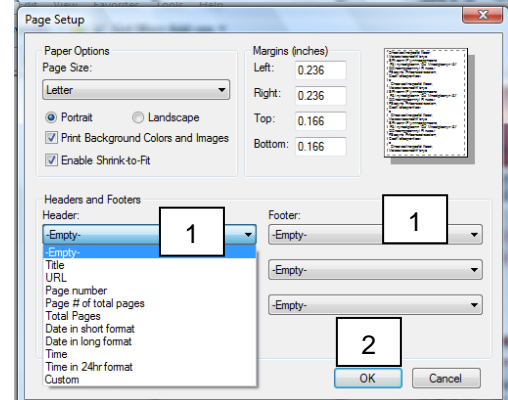

For Margins

1. Place a zero (0) in the *Left*: box. When you tab to the next box, your printer will set the default number to the lowest margin your printer can print. Repeat this with each of the margin boxes. Some computers may pop-up an error box and give you an option to fix it. Let your computer fix it.

For Headers and Footers

1. Click the down-arrow in each of the boxes and select *Empty*.
2. Click *OK* when you are done.

You are now all set to print Listing Detail Reports on one page.

Is the listing still printing on more than one page?

There is another tip to use in conjunction with the one above.

1. Go to *File* on the Menu bar.
2. Select *Print Preview*.
3. Change *Shrink to Fit* to *80%*

The listing should print on page. Experiment with lower values as needed.
